Following the significant rainfall event that occurred on June 9th and 10th, The RM of West Interlake continues to respond to impacts throughout the municipality.

Public Works remain actively working both within the LUD of Ashern and throughout the rural municipality to address concerns related to road washouts, drainage and other infrastructure impacts resulting from the excessive rainfall.

Vacuum trucks continue to operate within the LUD to assist with sewer system capacity issues and lift station flooding. Staff are closely monitoring water levels, drainage systems and the lagoons as conditions continue to evolve.

The RM remains in regular contact with Provincial agencies and emergency management partners and is monitoring the situation closely.

We appreciate the patience and cooperation of residents during this response effort. Please continue to use caution when travelling, particularly on gravel roads, and report areas of concern to the RM office.

Sandbags are available to ratepayers if needed, please contact the RM office to arrange for pick up.
